

Big Impact. Big Taste.

Small Farm.

Babylon's cloud-managed hydroponic Micro-Farms help create healthier communities and a cleaner planet.

*Compared To Traditional Methods,
Each Farm Uses:*

96% Less Water

Zero Pesticides

65% Less Fertilizer

Zero Miles of Transport

Every Micro-Farm produces up to **4,160** servings of flavorful and nutritious food from 40 varieties of leafy greens, herbs, microgreens, and edible flowers *all year long.*

babylonmicrofarms.com

The World's Easiest-To-Use Micro-Farm.

Improving your community through remotely managed, sustainable, and delicious produce.

The freshest food doesn't travel

Babylon Micro-Farms® produce food right in front of your eyes. Most food travels hundreds of miles before getting to your plate, losing nutrients and vitamins along the way. *Our food travels zero miles.* There is practically zero nutritional degradation. Harvests are packed with flavors.

2000^{sqft} of farmland in 15^{sqft}

Every Babylon Micro-Farm® is a vertical hydroponic farm, growing perfectly 24x7, 7 days a week, 365 days year. Every plant gets exactly what it needs when it needs it via the Babylon^{IQ} system that monitors and manages all farms all across the country. A smarter farm for a sustainable future.

HOW IT WORKS

Babylon Micro-Farm®

Babylon's Micro-Farms are cloud connected, remotely-monitored, beautiful growing machines that generate the highest nutritional value produce possible.

Guided Growing App™

The app gives harvesters access to the Micro-Farm's live data as it's managed by Babylon staff and AI. It also connects you with expert resources.

The Babylon Box™

Babylon sends on-demand seed pods with all the supplies needed to replant after a bountiful harvest for peak growing performance.
